

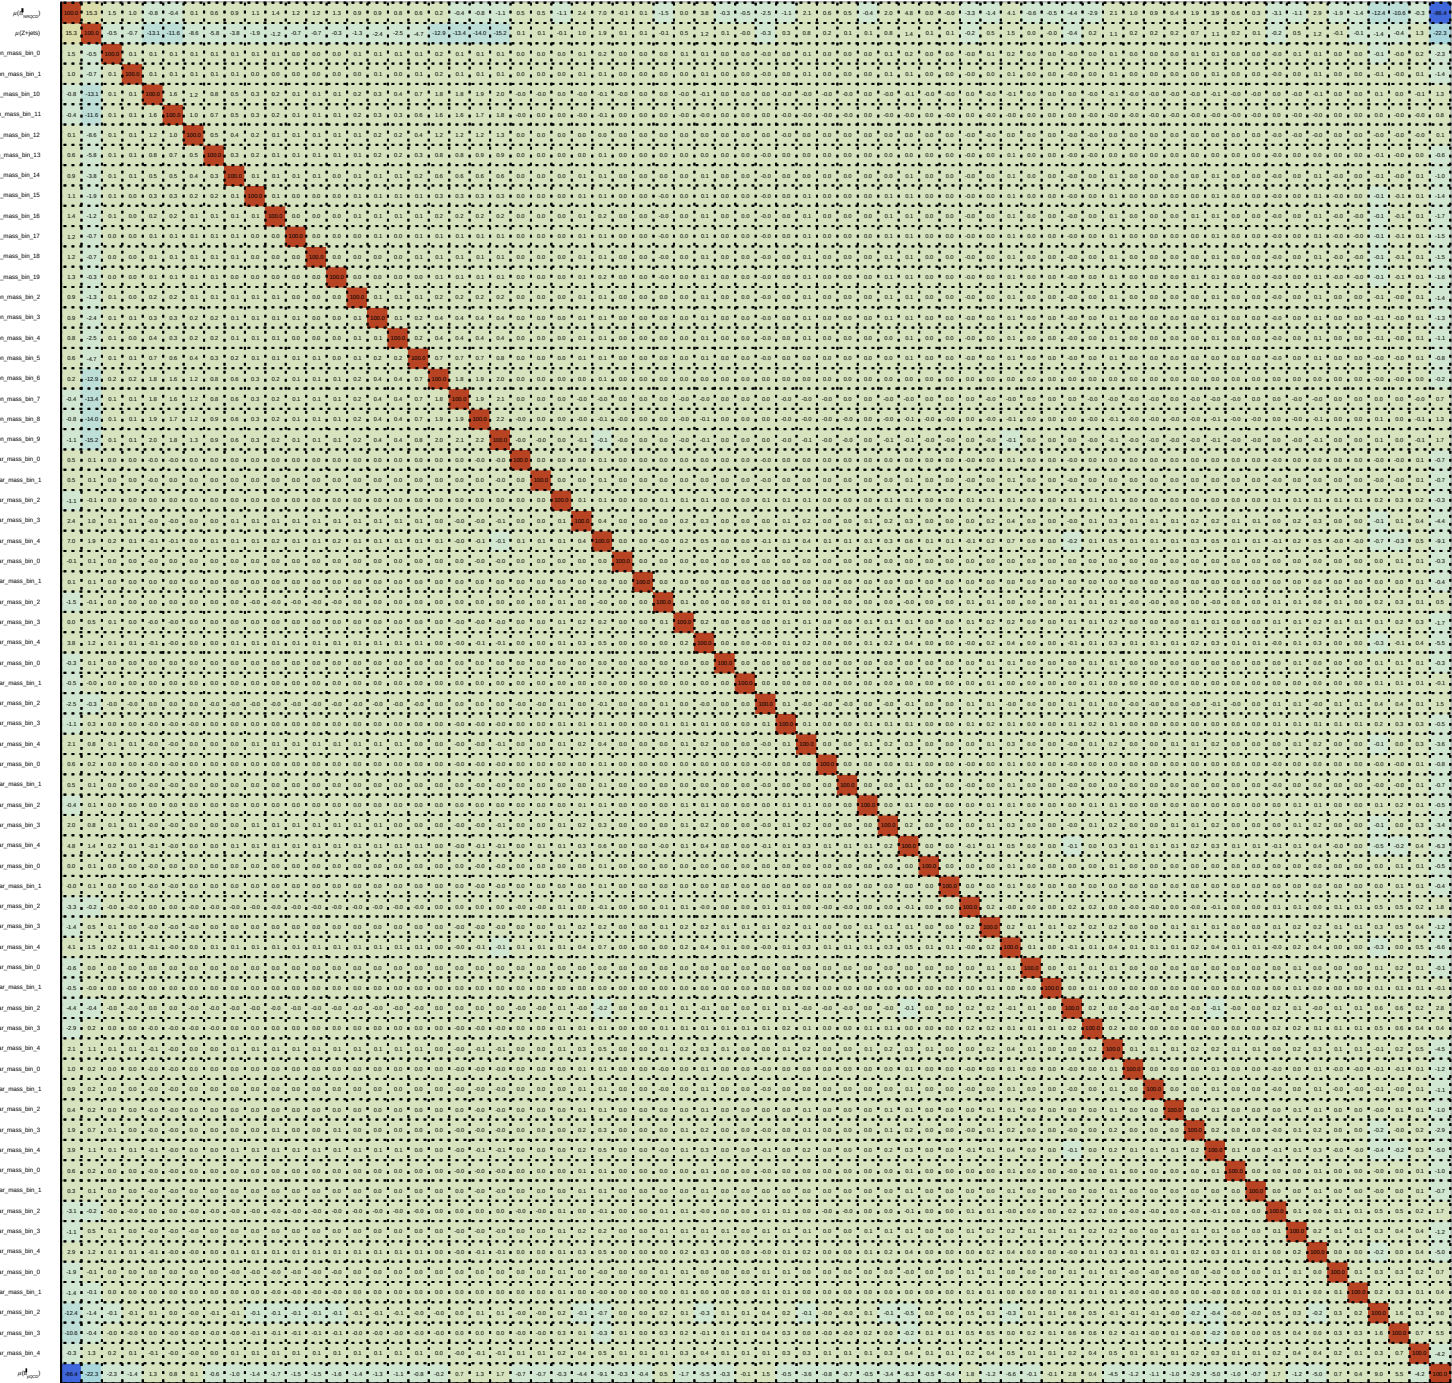

Figure 1: Heatmap visualization of the correlation matrix for 100 variables. The variables are listed on the left and bottom axes. The color scale ranges from -0.5 (blue) to 0.5 (red), with 0 being white. The diagonal elements are all 1.0, indicating perfect self-correlation. The off-diagonal elements show the correlation between different variables, with most values being close to 0, indicating low or no correlation.
